OUR EXPERIENCED TRAINING TEAM IS PROUD TO BE YOUR RESCUE SQUAD!

Superior Training Provides The Foundation For Performance Under The Most Hazardous And Difficult Circumstances. At All Risk Training And Safety, We Teach Your Employees How To Work Safely – And Help Ensure That Your Company Fulfills All Of Its OSHA Requirements.

Everyday, both you and your employees are at risk for potential health concerns due to dangerous hazardous materials and possible accidental situations located directly in your own workplace. Beware of the many causes of these disasters, which can easily be prevented with proper onsite training – especially as required by the Federal Government's OSHA standards and practices.

With nearly twenty years of education, expertise and experience in all facets of the chemical industry – especially as safety trainers within hazmat situations – our team will properly train your employees for a lifetime of safe working practices in your workplace. Our professional training squad can visit your facility on a regular basis for a series of courses to ensure the well being of your staff – and to be certain that your company has the lowest possible risk and financial exposure to problems caused directly by the mishandling of hazardous materials by your employees. Each of our informative courses is compliant with the requirements of 29 CFR 1910.120 for OSHA's Hazardous Waste Operations and Emergency Response (HAZWOPER).

At All Risk Training and Safety, our team takes pride in providing exceptional employee safety training to the finest companies in Northern and Central Illinois. Let us manage your ongoing staff safety training program – and look forward to enjoying the peace of mind that comes from turning this vital activity over to the experts who will help you save lives – and possibly even your business!

Our Valuable Training Classes Offered Include:

OSHA General Industry (10 Hour/30 Hour) – This course provides a review of OSHA policies, procedures and standards – as well as general industry safety and health principles.

8, 16, 24 and 40 Hour HAZWOPER Courses – These courses provide the classroom and skills based safety training requirements mandated by OSHA 29 CFR 1910.120. During this training session, your employees will learn the basic health and safety skills required to confidently work with and near hazardous materials and hazardous waste.

First Aid, AED and CPR – In this important course, your employees will learn how to best respond and manage breathing and cardiac emergencies in adults, infants and children. They will learn how to identify and care for bleeding, sudden illnesses and injuries. This course also includes an introduction to AED's and disease prevention. Upon completion, course participants receive three year certification from our company.

Let Us Perform an Important “Check Up” of Your Safety Program. Our Comprehensive Evaluations include the following:

- *OSHA Compliance Consultations*
- *Lockout Tagout*
- *Confined Space*
- *Respiratory Protection*
- *Powered Industrial Truck*
- *Safety Management Systems*

Does Your Safety Management Program Fall Short? Are You Unsure of How to Best Develop Your Corporate Plan? Our Expert Consultants Can Develop A Superior Safety System for Your Firm – and Even Help Manage the Process at Your Workplace.

Our All Risk team will work with your executive staff, department managers and key employees to devise an effective safety management system for your firm that will best ensure the well being of your staff and the financial interests of your company – while meeting or exceeding all of your OSHA requirements. Once we have created that plan for you, we will also manage your corporate safety program on a monthly basis.

Is Your Workplace a Potential “Danger Zone”? With Our Exceptional Training Courses and Ongoing Corporate Safety Management System Program, Your Employees Will Learn How to Work Safely.
